

Oreck uses the Julian calendar system for date coding products. The date is shown on the Data Sticker (Product label) as shown below. The first two digits represent the year (2006 in the label shown). The remaining three digits indicate the day of the year — in the label below it is the 95th day of the year 2006. I have also attached a Julian date code finder. This information is helpful in establishing the date of manufacture for warranty.
